DESCRIPTION

Oclip Pro is Olight's first clip-on light featuring a floodlight, spotlight, and red light—designed to meet diverse user needs. Compact and easy to carry, it offers three mounting options: clipping, hanging, and magnetic attachment. The clip securely holds objects up to 14 mm thick and has undergone 10,000 open-and-close tests. The strong magnet allows for stable attachment to iron surfaces, providing adjustable lighting angles. Significant upgrades include a spotlight with a 120-meter range and a powerful 500-lumen floodlight, alongside a 40-lumen red light. Switching between modes is quick and easy with a new rotary switch. In emergencies, users can activate Beacon or Red Blink modes, with the Beacon mode lasting up to 24 hours. With a large 580 mAh battery, the Oclip Pro boasts an impressive runtime of up to 144 hours. The metal dust cover and IPX6 water resistance ensure reliable performance, even with the charging port open.

FEATURES

- **Three Lights:** Allow you to flexibly select among the light modes for various lighting demands.
- **Compact Body:** With half of the size of the palm, it is easy to be carried for almost all everyday lighting purposes without adding burdens to you.
- **Multiple Fixing Methods:** The clip, the lanyard hole and the magnetic base provide many carrying solutions and free your hands when you need to operate with both hands.
- **Safety Signaling:** Send signals for positioning or alerts during emergencies with the beacon and red blink modes.
- **User-friendly UI Design:** The layout of the icons is designed according to using habit and frequency. Modes are switched through toggling the selector. The battery indicator in the center of the switch always reminds you of the battery level.
- **Lasts 144 Hours Before Recharge:** With the 580 mAh battery, its small body delivers a maximum runtime of 144 hours in Moonlight mode.
- **IPX6 Rating:** Protects against high-pressure water jets from any angle, remains waterproof even with the metal cover open.
